Communiqué de presse

Transamo, a branch of Transdev carries out the project management and the technical management for the Mans tramway taken into service on 17 November 2007

Transamo, a branch of Transdev specialized in assisting in supervising work for the design and implementation of large public transport projects on exclusive lanes provides local organizations with its expertise in order to guarantee costs deadlines and quality of solutions implemented.

Société d'équipement du Mans (SEM), the authorized agent of the du Mans metropolis has had recourse to Transamo's skills and know-how for carrying out the project management and the technical management. Since 2001, Transamo has been carrying out this project, which became reality on 17 November 2007 with the opening of the first 12-kilometre track.

This entire 15.4 kilometre track will be taken into service on 22 December four months ahead of plans.

Transamo will be continuing to guarantee perfect completion of the entire transport system for one year.

A few figures: 15.4 kilometres of track, 10 kilometres of turf, 23 coaches for a total investment of 300 million euros or about 20 million euros per kilometre!

With the most important references including Angers, Montpellier, Orléans, Toulouse, Valenciennes and Madrid... Transamo again confirms its leadership in assisting with projects and organizations in order to ensure the success of their public transport projects on exclusive lanes.
